

SYSTEM AND METHOD FOR BIDDING IN MULTIPLE AUCTIONS

ABSTRACT

- A system, method, apparatus and medium to obtain an item includes
- 5 identification of a plurality of auctions in which the item is being auctioned, and automatically submission of one or more bids to a plurality of the plurality of auctions in order to obtain the item. As a result of these features, the present invention may automatically execute a bidding strategy to obtain for a desired price an item being auctioned in more than one auction.
